

# Environmental Policy

## Ever Stone Building Contracting LLC

Ever Stone Building Contracting LLC is committed to sustainable construction practices that minimize environmental impact and contribute to a greener future. Our Environmental Policy aligns with UAE environmental regulations and international sustainability standards, reflecting our responsibility toward the environment and future generations.

We integrate environmental considerations into all phases of construction — from planning and design to execution and decommissioning. By conducting thorough environmental impact assessments, we identify potential risks and implement effective mitigation measures.

Key areas of focus include responsible waste management, energy efficiency, water conservation, and pollution prevention. We promote recycling, reuse of materials, and proper disposal of hazardous substances in line with approved methods. Site teams are trained on environmental procedures, spill response, and the importance of protecting natural resources.

We also engage with clients and consultants to explore and adopt eco-friendly design solutions and sustainable materials where feasible. By optimizing construction methods and equipment use, we aim to reduce emissions and energy consumption without compromising quality or safety.

Regular environmental audits and inspections ensure compliance with regulations and company standards. Findings are documented, and lessons learned are shared across projects to foster continuous improvement.

Beyond site operations, Ever Stone actively seeks to raise awareness among employees and partners about environmental stewardship. Through education and daily practices, we aim to embed sustainability into our company culture and contribute meaningfully to the UAE's environmental goals.
